VACANCY ANNOUNCEMENT

FISHERIES SPECIALIST – QUANTITATIVE ECOLOGIST

VACANCY #: 24-013

Location: Jamestown, RI

Closing Date: 12/14/2024

Salary: \$79,148 annually with benefits

Total compensation w/benefits \$109,769

(Starting salary commensurate with experience)

General Description

Working directly with the Rhode Island Department of Environmental Management (RI DEM) Division of Marine Fisheries, the **Quantitative Ecologist** will be responsible for leading analytic tasks directed to inform fisheries and ecosystem science and management and wildlife conservation for the State of Rhode Island.

The Quantitative Ecologist position is currently a one-year appointment, with the option to amend or extend pursuant to performance, available funding, and at the discretion of RI DEM.

Specific duties include:

- 1) Develop data-rich and/or data poor stock assessment models for marine resources managed by the State of Rhode Island or through interstate management.
- 2) Use quantitative tools and analyses to assess the performance of various management scenarios for informing fisheries and wildlife management bodies.
- 3) Conduct ecosystem analyses for Rhode Island state waters to inform ecosystem-based fisheries management plans for marine and anadromous species.
- 4) Develop analytical tools and conduct data analyses to support terrestrial wildlife management in Rhode Island.
- 5) Design wildlife population and or density estimation models.
- 6) Produce reports and peer-reviewed publications which summarize project data and findings.
- 7) Present findings at relevant fisheries science, natural resource management and wildlife conservation forums.
- 8) Perform related duties as assigned.

Qualifications

Applicants must have a Master's degree or greater in science related field (marine biology, biological science, natural resource science, oceanography, wildlife ecology, or a related field) and experience with quantitative fisheries science and theory. Applicants must have proven analytical skills, as well as excellent writing and oral communication skills. They must have the ability to work on multiple tasks concurrently, general knowledge of common software applications (e.g., Microsoft Suite, R, Python, TMB, ArcGIS), and a valid driver's license.

Preferred qualifications include a Master's degree in science-related field and 1-2 years related experience in professional marine science, a Doctorate degree in a relevant field, or a similar combination of education and experience. Prior experience participating in and conducting stock assessments is strongly preferred. Familiarity with assessment modeling platforms (Age Structured Assessment Program, Woods Hole Assessment Model, Stock Synthesis, Sex-age Kill models) is preferred. Knowledge of local or regional marine, freshwater, and wildlife species

MAINE • NEW HAMPSHIRE • MASSACHUSETTS • RHODE ISLAND • CONNECTICUT • NEW YORK • NEW JERSEY • DELAWARE
PENNSYLVANIA • MARYLAND • VIRGINIA • NORTH CAROLINA • SOUTH CAROLINA • GEORGIA • FLORIDA

and management of those species strongly preferred. Ability to work independently and/or with minimal supervision, manage and prioritize multiple project components, and complete multiple tasks independently with respect to timeline(s). Experience communicating/working with seafood dealers and fishing industry members preferred. U.S. citizenship is required.

Work Environment

The Quantitative Ecologist will divide their time between the offices of RI DEM's Division of Marine Fisheries located in Jamestown, Rhode Island, and the RI DEM Division of Fish and Wildlife in West Kingston, Rhode Island. Flexibility to work out of other RIDEM Facilities (e.g., Providence, Jerusalem) may be permitted based on performance and circumstances. Part-time telework is available up to two days per week.

This position is not eligible for overtime. Compensatory time and flexible working hours (with supervisory approval) are available under the Commission's policies; however, the Quantitative Ecologist is a salaried employee, and is expected to work seven (7) hours/day, five (5) days/week.

Supervision

The Quantitative Ecologist reports directly to RIDEM's Divisions of Marine Fisheries and Fish and Wildlife Supervising Biologists. The incumbent is expected to exercise initiative in addressing the needs of data analysis and other areas of responsibility, with specific guidance from the RIDEM's fisheries and wildlife biologists.

Application Process

Please email a resume and cover letter referencing the vacancy number (**24-013**) to Human Resources, Atlantic States Marine Fisheries Commission, 1050 N. Highland Street; Suite 200 A-N, Arlington, VA 22201 (asmfc-jobs@asmfc.org) by the closing date of December 14, 2024. The vacancy number (**24-013**) must be identified in the subject line.

Organization Profile: The Atlantic States Marine Fisheries Commission (Commission) is comprised of the 15 Atlantic coast states under the terms of an interstate compact approved in 1942. The purpose of the Commission, as set forth by Article I of its Compact, is: To promote the better utilization of the fisheries, marine, shell, and diadromous, of the Atlantic seaboard by the promotion and protection of such fisheries. As an instrumentality of the 15 Atlantic coastal states, the Commission is employed to coordinate the conservation and management of nearshore migratory fishery resources.

The Commission is an Equal Employment Opportunity employer and welcomes all qualified applicants regardless of age, sex, color, race, creed, national origin, religious persuasion, marital status, political belief, sexual preference, disability, or any other legally protected status. ASMFC is unable to sponsor applicants for work visas.

If you have a disability and need assistance applying for this position, you may call the ASMFC Human Resources office at (703) 842-0740 between the hours of 9:00 a.m. and 4:00 p.m. ET, Monday – Friday. Reasonable accommodations for interviews will be provided upon request to individuals with disabilities.
