ASMFC Approves Addenda XXXI and XXXII to the Summer Flounder, Scup and Black Sea Bass Fishery Management Plan

Annapolis, MD – The Commission’s Summer Flounder, Scup, and Black Sea Bass Management Board (Board), at its joint meeting with the Mid-Atlantic Fishery Management Council (Council), approved Addenda XXXI and XXXII to the Summer Flounder, Scup and Black Sea Bass Fishery Management Plan (FMP).

Addendum XXXI

Addendum XXXI, coupled with the Council’s complementary Framework Document, adds to the suite of tools available for managing summer flounder, scup and black sea bass, with particular focus on enhancing the compatibility of state and federal regulations.

First, the joint action modifies the Council and Commission FMPs to allow the use of conservation equivalency for black sea bass recreational management, beginning in 2020. Conservation equivalency allows recreational management measures in federal waters measures to be waived, and instead requires recreational anglers to abide by the measures of the state in which they land their catch. As is done in summer flounder recreational management, the Board and Council will annually decide whether to enact conservation equivalency.

Second, the Commission recommended NOAA Fisheries implement transit provisions in Block Island Sound, allowing non-federally permitted recreational and commercial vessels to transit federal waters while in possession of summer flounder, scup, and black sea bass legally harvested from state waters.

Lastly, the Council’s Framework allows for the use of maximum sizes in addition to minimum sizes, commonly referred to as slot limits, to control catch in the summer flounder and black sea bass recreational fisheries. The Commission’s FMP already allows for use of this approach, thereby allowing both management bodies to use this measure in the future.

Addendum XXXII

Addendum XXXII establishes a new process for developing recreational management measures for summer flounder and black sea bass. These measures will be set on an annual basis through a specifications process, rather than addenda. The Board will approve measures in early spring each year, based on technical committee analysis of stock status, resource availability, and harvest estimates. Public input on specifications will be gathered by states through their individual public comment processes.

The Atlantic States Marine Fisheries Commission was formed by the 15 Atlantic coastal states in 1942 for the promotion and protection of coastal fishery resources. The Commission serves as a deliberative body of the Atlantic coastal states, coordinating the conservation and management of nearshore fishery resources, including marine, shell and anadromous species.

By removing the need to develop annual addenda to implement recreational measures, the specifications process will provide the Board more flexibility in adjusting measures, if necessary, to constrain harvest to the annual coastwide recreational harvest limit (RHL). Further, the process will enable the Board to consider a host of factors, including: regional equity; regulatory stability; species abundance and distribution; and late-breaking recreational harvest estimates. To further aid in setting specifications, the Addendum establishes standards and guiding principles intended to structure the development of recreational measures on a regional basis.

Addenda XXXI and XXXII will be available on the Commission website, www.asmfc.org, on each species webpage by the end of December. For more information on summer flounder and scup, please contact Kirby Rootes-Murdy, Senior Fishery Management Plan Coordinator, at krootes-murdy@asmfc.org or for information on black sea bass, contact Caitlin Starks, Fishery Management Plan Coordinator, at cstarks@asmfc.org, or 703.842.0740.

PR18-41

Motions

Black Sea Bass 2019 Recreational Measures

Move to recommend status quo recreational measures for 2019 in federal waters, including a 12.5 inch minimum fish size, a 15 fish bag limit, and a season of May 15 - December 31. If the states do not take appropriate action to ensure harvest does not exceed the RHL, backstop measures of 14 inches, 5 fish, and a May 15 - September 15 season would be implemented in state and federal waters.

Council: Motion made by Mr. O'Reilly and seconded by Mr. Mann (20 in favor)

Board: Motion made by Mr. O'Reilly and seconded by Mr. Davis (11 in favor)

Motion passes

Scup 2019 Recreational Measures

Move that the Commission continue the regional approach to management in state waters with state measures to be finalized at the February 2019 Board meeting.

Board: Motion made by Mr. Borden and seconded by Mr. Hasbrouck (10 in favor, 1 abstention)

Motion passes

Framework/Addendum 31

Move to approve alternative 1B (black sea bass conservation equivalency using the current summer flounder conservation equivalency process).

Council: Motion made by Mr. O'Reilly and seconded by Mr. deFur (13 in favor, 4 opposed)

Board: Motion made by Mr. O'Reilly and seconded by Ms. Meserve (10 in favor, 1 opposed)

Motion passes

Main Motion

Move to approve alternatives 3B (Block Island Sound transit) 3B-1 (RI-RI transit area), and 3B-4 (recreational and commercial) for Block Island Sound transit provisions.

Board: Motion made by Mr. Reid and seconded by Mr. O'Reilly

Council: Motion made by Mr. O'Reilly and seconded by Mr. Michels

Motion to Amend

Move to amend to substitute 3B-2 (striped bass transit area) for 3B-1 (RI-RI transit area).

Board: Motion made by Mr. Nowalsky and seconded by Mr. Davis (10 in favor, 1 opposed)

Council: Motion made by Mr. Nowalsky and seconded by Mr. Heins (18 in favor)

Motion passes

Main Motion as Amended

Move to approve alternatives 3B (Block Island Sound transit), 3B-2 (striped bass transit area), and 3B-4 (recreational and commercial) for Block Island Sound transit provisions.

Board: Motion passes (11 in favor)

Council: Motion passes by consent

Main Motion

Move to amend the Summer Flounder Scup and Black Sea Bass FMP to allow a maximum size limit to be used in the recreational summer flounder fishery.

Council: Motion made by Mr. Elliott and seconded by Mr. deFur

Motion to Amend

Move to amend to add black sea bass.

Council: Motion made by Mr. Nowalsky and seconded by Mr. Michels (12 in favor, 6 opposed)

Main Motion as Amended

Move to amend the Summer Flounder, Scup, and Black Sea Bass FMP to allow a maximum size limit to be used in the recreational summer flounder and black sea bass fisheries.

Council: Motion passes (14 in favor, 4 opposed)

Move to adopt Addendum XXXI as modified by the board today.

Board: Motion made by Mr. Clark and seconded by Mr. Davis

Motion passes unanimously

Summer Flounder Amendment

Move to postpone final action on the Summer Flounder Commercial Issues Amendment and to develop additional options on commercial quota allocations with specific alternatives being submitted by individual states to ASMFC/MAFMC staff no later than January 15, 2019 for discussion at the meeting in February 2019.

Board: Motion made by Mr. Gilmore and seconded by Mr. Davis (Roll Call: In Favor – MA, RI, CT, NY, MD, NMFS; Opposed – NJ, DE, PRFC, VA, NC; Absent – USFWS).

Council: Motion made by Mr. DiLernia and seconded by Ms. Nolan (8 in favor, 10 opposed)

Motion fails

Move to postpone further discussion of this amendment until the February 2019 joint meeting.

Council: Motion made by Mr. Elliott and seconded by Ms. Davidson (11 in favor, 8 opposed)

Board: Motion made by Ms. Meserve and seconded by Mr. Davis (7 in favor, 3 opposed, 1 null)

Motion passes
