ASMFC Atlantic Striped Bass Board Extends Emergency Action through October 28, 2024 & Continues Development of Additional Measures to Aid Rebuilding

Arlington, VA – The Commission’s Atlantic Striped Bass Management Board extended the current emergency action through October 28, 2024 or until the implementation of Addendum II to Amendment 7 of the Interstate Fishery Management Plan. In May, the Board approved a 31-inch maximum size limit for the 2023 recreational fishery to reduce harvest of the strong 2015-year class. The 31-inch maximum size limit applies to all existing recreational fishery regulations where a higher (or no) maximum size applies, excluding the May Chesapeake Bay trophy fisheries which already prohibit harvest of fish less than 35 inches. All bag limits, seasons, and gear restrictions remain the same. All states and jurisdictions implemented the required measure by July 2, 2023.

The emergency action responds to the unprecedented magnitude of 2022 recreational harvest, which is nearly double that of 2021, and new stock rebuilding projections, which estimate the probability of the spawning stock rebuilding to its biomass target by 2029 drops from 97% under the lower 2021 fishing mortality rate to 15% if the higher 2022 fishing mortality rate continues each year.

The extension of the emergency action provides the Board time to develop and finalize Draft Addendum II, which will consider 2024 management measures designed to reduce fishing mortality to the target. Specifically, the Draft Addendum will propose options for the ocean recreational fishery, including modifications to the slot limit with harvest season closures as a secondary non-preferred option. It will also propose options for the Chesapeake Bay recreational fisheries, as well all commercial fisheries, including maximum size limits.

The Board made changes to the Draft Addendum’s options and sought additional analyses on the impacts of those revised options to the rebuilding of the resource. The Board will review a revised Draft Addendum and consider its approval for public comment in October at the Commission’s Annual Meeting. If approved, the document will be made available for public comment and the states/jurisdictions will conduct public hearings to solicit public comment throughout the fall/early winter. It’s anticipated that the Board will consider public comment and take final action in January at the Commission’s Winter Meeting. For more information, please contact Toni Kerns, Fisheries Policy Director, at tkerns@asmfc.org.

PR23-20

The Atlantic States Marine Fisheries Commission was formed by the 15 Atlantic coastal states in 1942 for the promotion and protection of coastal fishery resources. The Commission serves as a deliberative body of the Atlantic coastal states, coordinating the conservation and management of nearshore fishery resources, including marine, shell and diadromous species.
