ASMFC Coastal Sharks Board Approves Addendum IV to the FMP

Alexandria, VA – The Coastal Sharks Management Board approved Addendum IV to the Interstate Fishery Management Plan (FMP) for Atlantic Coastal Sharks. The Addendum amends the FMP to allow smooth dogfish carcasses to be landed with corresponding fins removed from the carcass as long as the total retained catch on board at the time of landing is composed of at least 25 percent smooth dogfish. Trips that do not meet the 25 percent catch composition requirement can land smooth dogfish, but the fins must remain naturally attached to the carcass. Naturally attached is defined as attached to the corresponding shark through some portion of uncut skin.

Through the Board's action, the Addendum maintains consistency between federal and state shark FMPs and better incorporates the intent of the smooth dogfish limited exception in the Shark Conservation Act of 2010 (SCA) into state regulations. States are required to implement the Addendum's management measure by January 1, 2017.

The Addendum will be available on the Commission website, www.asmfc.org, on the Coastal Sharks page by mid-August. For more information, please contact Ashton Harp, Fishery Management Plan Coordinator, at aharp@asmfc.org or 703.842.0740.

PR16-20

The Atlantic States Marine Fisheries Commission was formed by the 15 Atlantic coastal states in 1942 for the promotion and protection of coastal fishery resources. The Commission serves as a deliberative body of the Atlantic coastal states, coordinating the conservation and management of nearshore fishery resources, including marine, shell and anadromous species.
