ASMFC Summer Flounder Board Initiates Draft Addendum for Alternative Management Options for 2017 Recreational Fishery

Bar Harbor, ME – The Commission’s Summer Flounder, Scup and Black Sea Bass Management Board initiated development of Draft Addendum XXVIII to the Summer Flounder Fishery Management Plan (FMP) to consider alternative management approaches, including regional options, for the 2017 recreational summer flounder fishery. The Draft Addendum will have options which are designed to achieve the 2017 recreational harvest limit (RHL).

Changes in summer flounder distribution, abundance and availability created problems under the static state-by-state allocations, with overages often occurring. In response, states would implement regulations to reduce harvest, resulting in differing regulations between neighboring states. In 2014, the Board shifted away from traditional state-by-state allocations to a regional approach for managing summer flounder recreational fisheries. A benefit of the regional approach is it provides the states the flexibility to temporarily share allocations. The intent is to set regulations that account for shifting distribution, abundance and availability while providing stability and greater regulatory consistency among neighboring states as well as individual states in achieving but not exceeding the coastwide RHL.

In August, the Board and Mid-Atlantic Fishery Management Council (Council) approved a 30% reduction in the 2017 coastwide RHL relative to 2016. This was in response the 2016 Stock Assessment Update which found fishing mortality was higher in recent years and population estimates were lower than previously projected.

The Draft Addendum will be presented to the Board for its consideration and approval for public comment at its joint meeting with the Council in December in Baltimore, Maryland. At that meeting, the Board and Council will also consider extending ad-hoc regional approaches for 2017 black sea bass and scup recreational management in state waters. The Board and Council are scheduled to review the Black Sea Bass Stock Assessment Report and Peer Review Report and consider possible management responses at their joint meeting in February 2017 in Kitty Hawk, North Carolina.

PR15-36

The Atlantic States Marine Fisheries Commission was formed by the 15 Atlantic coastal states in 1942 for the promotion and protection of coastal fishery resources. The Commission serves as a deliberative body of the Atlantic coastal states, coordinating the conservation and management of nearshore fishery resources, including marine, shell and anadromous species.
