### **ASMFC Seeks Proposals to Conduct Components of the At-Sea Monitoring Training Program**

The Atlantic States Marine Fisheries Commission, in cooperation with the National Marine Fisheries Service's (NMFS) Northeast Fisheries Science Center (NEFSC), is issuing a Request for Proposal (RFP) to conduct components of the At-Sea Monitoring (ASM) Training Program for the NEFSC.

NMFS is required to collect biological and compliance data aboard U.S. domestic fishing vessels, data which cannot be obtained at the dock or on research vessels. Specifically, NMFS observer data is essential to reliably estimating catch and bycatch, and in helping to implement programs to reduce bycatch. A sharp increase to the coverage rate (up to 100%) for the Northeast Multispecies Fishery in Fishing Year 2022 and observer attrition during the 2020 fishing year have resulted in the need for approximately 140 new at-sea monitors.

The Awardee shall provide and retain the necessary qualified personnel, materials, equipment, services, and facilities to conduct components of the ASM training for NEFSC. The Awardee shall conduct approximately 4-6 trainings per year. The training will be conducted as a collaborative effort between NMFS and the Awardee; where some components of the training will be conducted by the Awardee and some training components will be conducted by NMFS.

Applicants seeking to apply to the RFP must submit, as a single file, an electronic proposal by email no later than 5:00 p.m. EST on May 19, 2021. Please see the RFP for complete proposal details, qualifying requirements, and submission instructions. The RFP is available at [http://www.asmfc.org/files/RFPs/AtSeaMonitorTrainingRFP\\_April2021.pdf](http://www.asmfc.org/files/RFPs/AtSeaMonitorTrainingRFP_April2021.pdf).

For more information, please contact Deke Tompkins at [dtompkins@asmfc.org](mailto:dtompkins@asmfc.org) or 313.303.2623.

PR21-09

---

The Atlantic States Marine Fisheries Commission was formed by the 15 Atlantic coastal states in 1942 for the promotion and protection of coastal fishery resources. The Commission serves as a deliberative body of the Atlantic coastal states, coordinating the conservation and management of nearshore fishery resources, including marine, shell and diadromous species.
