ASMFC American Eel Board Approves Draft Addendum III for Public Comment

Alexandria, VA –The Commission’s American Eel Management Board approved Draft Addendum III to the Interstate Fishery Management Plan for American Eel for public comment. The Draft Addendum proposes a wide range of management options with the goal of reducing mortality and increasing the conservation of American eel stocks across all life stages. Specific management options focus on both the commercial (glass, yellow, and silver eel life stages) and recreational American eel fisheries. The document also proposes increased monitoring by the states and recommendations to improve American eel habitat.

Draft Addendum III responds to the findings of the 2012 benchmark stock assessment indicating the American eel population in U.S. waters is depleted. The stock has declined in recent decades and the prevalence of significant downward trends in multiple surveys across the coast is cause for concern. Causes of decline are likely due to a combination of historical overfishing, habitat loss, food web alterations, predation, turbine mortality, environmental changes, toxins and contaminants, and disease.

Commercial regulations vary by state. Glass eel fisheries currently occur in Maine and South Carolina. Significant yellow eel fisheries occur in New Jersey, Delaware, Maryland, the Potomac River, Virginia, and North Carolina. Although commercial fishery landings and effort in recent times have declined in most regions, current levels of fishing effort may still be too high given the depleted nature of the stock. States and jurisdictions are required to annually report on commercial harvest and monitor juvenile abundance. The recreational fishery is currently regulated by a 50 fish per day creel limit and a six inch size minimum, although recreational harvest is believed to be low.

It is anticipated that the majority of Atlantic coastal states will be conducting hearings on the Draft Addendum. A subsequent press release will announce the Draft Addendum’s availability as well as the details of the scheduled hearings. Final action on the Addendum is scheduled to occur in May. For more information, please contact Kate Taylor, Senior Fishery Management Coordinator, at ktaylor@asmfc.org or 703.842.0740.

PR13-07

The Atlantic States Marine Fisheries Commission was formed by the 15 Atlantic coastal states in 1942 for the promotion and protection of coastal fishery resources. The Commission serves as a deliberative body of the Atlantic coastal states, coordinating the conservation and management of nearshore fishery resources, including marine, shell and anadromous species.
