The Atlantic States Marine Fisheries Commission was formed by the 15 Atlantic coastal states in 1942 for the promotion and protection of coastal fishery resources. The Commission serves as a deliberative body of the Atlantic coastal states, coordinating the conservation and management of nearshore fishery resources, including marine, shell and diadromous species.

<b>Thursday, August 1</b> <b>Webinar Hearing</b> 6:00 – 8:00 p.m.	<b>Maine Dept. of Marine Resources, New Hampshire Fish and Game Dept., &amp; Massachusetts Division of Marine Fisheries</b>  <i>The <a href="#">webinar registration link is available here</a>, and additional webinar instructions are below.</i>	<a href="#">Chelsea Tuohy (ASMFC)</a> 703.842.0714

Given the stock’s continued depleted status, the draft amendment was initiated to consider extending the specifications setting timeline to allow for ongoing or multiyear harvest moratoria and adding management triggers to the management program. A management trigger, defined by a set of biological indicators, would inform when a harvest moratorium could be reevaluated to allow for a potential fishery in future years.

As the first step in the Commission’s amendment process, the PID is intended to gather information concerning northern shrimp and provide an opportunity for the public to identify and comment on major issues relative to the management of the species. Following the initial phase of information gathering and public comment, the Section will evaluate potential management alternatives and develop Draft Amendment 4 for public review. After the next round of public comment, the Section will identify the management measures to be included in Amendment 4. A tentative schedule for the completion of Amendment 4 is included in the PID.
