

# Atlantic States Marine Fisheries Commission

## American Lobster Management Board

*March 18, 2025  
3:00 – 4:00 p.m.  
Webinar Meeting*

### Draft Agenda

The times listed are approximate; the order in which these items will be taken is subject to change; other items may be added as necessary

1. Welcome/Call to Order (*R. Zobel*) 3:00 p.m.
2. Board Consent 3:00 p.m.
  - Approval of Agenda
  - Approval of Proceedings from February 2025
3. Public Comment 3:05 p.m.
4. Consider Draft Addendum XXXII on Repealing Gauge and Vent Size Changes of Addendum XXVII for Public Comment (*C. Starks*) **Action** 3:15 p.m.
5. Other Business/Adjourn 4:00 p.m.

The meeting will be held via webinar; click [here](#) for details.

# MEETING OVERVIEW

## American Lobster Management Board

March 18, 2025

3:00 – 4:00 p.m.

Chair: Renee Zobel (NH) Assumed Chairmanship: 03/25	Technical Committee Chair: Tracy Pugh (MA)	Law Enforcement Committee Rep: Rob Beal (ME)
Vice Chair: Vacant	Lobster Advisory Panel Chair: Grant Moore (MA) Jonah Crab Advisory Panel Chair: Sonny Gwin	Previous Board Meeting: February 4, 2025
Voting Members: ME, NH, MA, RI, CT, NY, NJ, PA, DE, MD, DC, PRFC, VA, NMFS, NEFMC (12 votes)		

### 2. Board Consent

- Approval of Agenda
- Approval of Proceedings from February 2025

**3. Public Comment** – At the beginning of the meeting, public comment will be taken on items not on the agenda. Individuals that wish to speak at this time must sign-in at the beginning of the meeting. For agenda items that have already gone out for public hearing and/or have had a public comment period that has closed, the Board Chair may determine that additional public comment will not provide additional information. In this circumstance, the Chair will not allow additional public comment on an issue. For agenda items that the public has not had a chance to provide input, the Board Chair may allow limited opportunity for comment. The Board Chair has the discretion to limit the number of speakers and/or the length of each comment.

### 4. Consider Draft Addendum XXXII on Repealing Gauge and Vent Size Changes of Addendum XXVII for Public Comment (3:15-4:00 p.m.)

#### Background

- In February, the Board initiated Draft Addendum XXXII to Amendment 3 to the Interstate Fishery Management Plan for American Lobster. The Addendum will consider repealing all Addendum XXVII measures pertaining to gauge and escape vent size limits, with the intention of working closely with the lobster industry to develop alternative conservation measures.

#### Presentations

- Overview of Draft Addendum XXXII for Public Comment by C. Starks

#### Board Actions for Consideration

- Approve Draft Addendum XXXII for Public Comment

### 5. Other Business/Adjourn (4:00 p.m.)

## ***Atlantic States Marine Fisheries Commission***

### **DRAFT ADDENDUM XXXII TO AMENDMENT 3 TO THE AMERICAN LOBSTER FISHERY MANAGEMENT PLAN FOR PUBLIC COMMENT**

#### ***Repealing Addendum XXVII Measures***

This draft document was developed for Management Board review and discussion. This document is not intended to solicit public comment as part of the Commission/State formal public input process. However, comments on this draft document may be given at the appropriate time on the agenda during the scheduled meeting. Also, if approved, a public comment period will be established to solicit input on the issues contained in the document.

**March 2025**

*Sustainable and Cooperative Management of Atlantic Coastal Fisheries*

**Draft Document for Board Review. Not for Public Comment.**

**Public Comment Process and Proposed Timeline**

In February 2025, the American Lobster Management Board (Board) initiated Draft Addendum XXXII to consider repealing certain measures of Addendum XXVII. Addendum XXVII established a trigger mechanism to automatically implement management measures to provide additional protection of the Gulf of Maine/Georges Bank (GOM/GBK) spawning stock biomass. Under Addendum XXVII, changes to gauge and escape vent sizes in Lobster Conservation Management Areas (LCMAs) 1 (Gulf of Maine), 3 (offshore federal waters) and Outer Cape Cod (OCC) were triggered in October 2023 based on an observed decline in recruit abundance indices of >35% from the reference level (equal to the three-year average from 2016-2018). The Board established the implementation date of the series of changes to gauge and vent size to begin July 1, 2025 to allow the Gulf of Maine states the opportunity to coordinate with Canada regarding possible trade implications, and give the industry and gauge makers additional time to prepare for these changes.

Draft Addendum XXXII considers repealing all measures from Addendum XXVII pertaining to gauge and escape vent sizes.

The public is encouraged to submit comments regarding the proposed management options in this document at any time during the addendum process. The final date comments will be accepted is **\_\_\_\_, 2025 at 11:59 p.m. EST**. Comments may be submitted by mail or email. If you have any questions or would like to submit comments, please use the contact information below.

DRAFT

## **1.0 Introduction**

The Atlantic States Marine Fisheries Commission (ASMFC) has coordinated the interstate management of American lobster (*Homarus americanus*) from 0-3 miles offshore since 1996. American lobster is currently managed under Amendment 3 and Addenda I-XXXI to the Fishery Management Plan (FMP). Management authority in the exclusive economic zone (EEZ) from 3-200 miles from shore lies with NOAA Fisheries. The management unit includes all coastal migratory stocks between Maine and Virginia. Within the management unit there are two lobster stocks and seven management areas. The Gulf of Maine/Georges Bank (GOM/GBK) stock (subject of this draft addendum) is primarily comprised of three Lobster Conservation Management Areas (LCMAs), including LCMAs 1 (GOM), 3 (federal waters), and Outer Cape Cod (OCC). There are three states (Maine through Massachusetts) which regulate American lobster in states waters of the GOM/GBK stock; however, landings from the GOM/GBK stock occur from Rhode Island through New York and these states regulate the landings of lobster in their state.

In February 2025, the Board passed the following motion:

*Move to initiate an Addendum to repeal all gauge and vent size changes in Addendum XXVII. The other sections of Addendum XXVII will remain in effect.*

This Draft Addendum considers repealing the gauge and escape vent size changes in section 3.1 and 3.2 of Addendum XXVII. The Draft Addendum does not consider repealing v-notch regulations nor regulations prohibiting the issuance of 10% additional trap tags in Areas 1 and 3 above the trap limit or allocation.

## **2.0 Overview**

### **2.1 Background**

Addendum XXVII was approved on May 2023, establishing a trigger mechanism to automatically implement management measures to provide additional protection of the GOM/GBK spawning stock biomass. Under Addendum XXVII, changes to gauge and escape vent sizes LCMAs 1, 3, and OCC would be initiated based on an observed decline in recruit abundance indices of 35% from the reference level (equal to the three-year average from 2016-2018).

In October 2023, the American Lobster Technical Committee reported that with the inclusion of 2022 data in the index time series, the trigger index had declined by 39%, surpassing the trigger point of a 35% decline. The original implementation date for the series of required gauge and vent size changes, starting with the first decrease to the LCMA 1 minimum gauge size, was June 1, 2024. However, in October 2023 the Board delayed the implementation of the measures in Addendum XXVII to January 1, 2025. The extension aimed to provide the Gulf of Maine states the opportunity to coordinate with Canada regarding possible trade implications and give the industry and gauge makers additional time to prepare for the changes.

In October 2024, the Board approved Addendum XXXI, which postponed implementation of the biological management measures (OCC maximum gauge size, v-notch definition, and LCMA 1 gauge and vent sizes) of Addendum XXVII an additional six months to July 1, 2025. The additional delay was intended to reduce negative impacts to the US and Canadian lobster industries in 2025 and allow Canada more time to consider implementing complementary management measures. For LCMA 1 and 3 permit holders, Addendum XXVII required states to implement regulations to limit the issuance of trap tags to equal the harvester trap tag allocations unless trap losses are documented. Implementation of this measure was required by January 1, 2025.

## 2.2 Statement of the Problem

Following the approval of Addendum XXXI in October 2024, lobster industry members in the states of Maine, New Hampshire, and Massachusetts expressed significant concern regarding the potential economic impacts of increasing the minimum gauge size in LCMA 1 and about the uncertainty surrounding the implications for trade with Canada. The Board agreed that consideration of alternative management measures was warranted to address these concerns. Concurrently with this action, the Gulf of Maine states will hold scoping discussions with their lobster industries to identify alternative conservation strategies to protect the long-term health of the resource.

## 3.0 Proposed Management Options

The following management options consider repealing measures under Section 3.1 and 3.2 of Addendum XXVII pertaining to gauge and escape vent sizes. It does not consider changes to the regulations prohibiting the issuance of 10% additional trap tags in Areas 1 and 3 above the trap limit or allocation.

When the Board takes final action on the addendum, there is the opportunity to select any measure within the range of options that went out for public comment, including combining options across issues.

### Option A: Status Quo

This option would maintain the current implementation schedule adopted under Addendum XXXI for all Addendum XXVII management measures.

Implementation of Management Measures Under Option A			
Area	LCMA 1	LCMA 3	OCC
Current Measures	Minimum gauge: 3 ¼" Maximum gauge: 5" Vent size: status quo	Minimum gauge: 3 <sup>17</sup> / <sub>32</sub> " Maximum gauge: 6 ¾" Vent size: status quo	Minimum gauge: 3 ⅜" Maximum gauge: 6 ¾" Vent size: status quo
July 1, 2025	<b>Minimum gauge size: 3 ⅝" (84 mm)</b>	<i>Status quo</i>	<i>Status quo</i>
July 1, 2027	<b>Minimum gauge size: 3 ⅜" (86 mm)</b>	<i>Status quo</i>	<i>Status quo</i>

July 1, 2028	<b>Vent size:</b> 2 x 5 <sup>3</sup> / <sub>4</sub> " rectangular; 2 <sup>5</sup> / <sub>8</sub> " circular	<i>Status quo</i>	<i>Status quo</i>
July 1, 2029	<i>Status quo</i>	<b>Maximum gauge size:</b> 6 <sup>1</sup> / <sub>2</sub> "	<b>Maximum gauge size:</b> 6 <sup>1</sup> / <sub>2</sub> "

**Option B: Repeal Addendum XXVII Gauge and Vent Size Measures**

Under this option, all changes to gauge and escape vent sizes established by Addendum XXVII would be repealed. These include:

- The change to the maximum gauge size required in OCC established in Section 3.1 of Addendum. This would result in a maximum gauge size of 6-<sup>3</sup>/<sub>4</sub>" for federal permit holders, and no maximum gauge size for state-waters only permit holders.
- The minimum and maximum gauge size changes triggered under Section 3.2 of Addendum XXVII. The minimum size for LCMA 1 would be 3 <sup>1</sup>/<sub>4</sub>" and there would be no additional changes to the maximum gauge size for LCMA 3 and OCC.

If this option is adopted, the following provisions of Addendum XXVII would be maintained:

- Standardize the v-notch possession definition for all permit holders in OCC to <sup>1</sup>/<sub>8</sub>" with or without setal hairs. The implementation date for this measure would be July 1, 2025.
- Implement regulations for LCMAs 1 and 3 to limit the issuance of trap tags to equal the harvester trap tag allocation. This means no surplus trap tags will be automatically issued to permit holders for these areas until trap losses occur and are documented. The implementation deadline for this measure was January 1, 2025.

<b>Proposed Management Measures Under Option B</b>			
<b>Area</b>	<b>LCMA 1</b>	<b>LCMA 3</b>	<b>OCC</b>
Current Measures	Minimum gauge: 3 <sup>1</sup> / <sub>4</sub> " Maximum gauge: 5" Vent size (rectangular): 1 <sup>15</sup> / <sub>16</sub> x 5 <sup>3</sup> / <sub>4</sub> " Vent size (circular): 2 <sup>7</sup> / <sub>16</sub> "	Minimum gauge: 3 <sup>17</sup> / <sub>32</sub> " Maximum gauge: 6 <sup>3</sup> / <sub>4</sub> " Vent size (rectangular): 2 <sup>1</sup> / <sub>16</sub> x 5 <sup>3</sup> / <sub>4</sub> " Vent size (circular): 2 <sup>11</sup> / <sub>16</sub> "	Minimum gauge: 3 <sup>3</sup> / <sub>8</sub> " Maximum gauge: 6 <sup>3</sup> / <sub>4</sub> " Vent size (rectangular): 2 x 5 <sup>3</sup> / <sub>4</sub> " Vent size (circular): 2 <sup>5</sup> / <sub>8</sub> "
July 1, 2025	<i>Status quo</i>	<i>Status quo</i>	<b><i>V-notch possession definition for all permit holders: 1 /8" with or w/out setal hairs</i></b>

**4.0 Compliance**

If the existing FMP is revised by approval of this Draft Addendum, the Board will designate dates by which states will be required to implement the provisions included in the addendum, if necessary.

## **5.0 Recommendations for Actions in Federal Waters**

The management of American lobster in the EEZ is the responsibility of the Secretary of Commerce through the National Marine Fisheries Service. If this Draft Addendum is approved, the Atlantic States Marine Fisheries Commission would withdraw its recommendations to the federal government to promulgate regulations to implement measures repealed by this addendum.
