American Lobster Board Releases Draft Addendum XXXI for Public Comment *Draft Addendum Considers Postponing Implementation of Addendum XXVII Biological Management Measures*

Arlington, VA – A public hearing has been scheduled to gather input on Draft Addendum XXXI to Amendment 3 to the Interstate Fishery Management Plan for American Lobster. The Draft Addendum considers postponing the implementation of Addendum XXVII gauge and escape vent size changes to July 1, 2025. One general hearing will be conducted via webinar and is open to all to participate. The public hearing details follow:

Date and Hearing Format	State/Agency	Contact
Monday, September 23 Webinar Hearing 6:00 – 8:00 p.m.	General Public Hearing Webinar <i>The webinar registration link is available here, and additional webinar instructions are below.</i>	Caitlin Starks 703.842.0740

Addendum XXVII was adopted in May 2023 and established a trigger mechanism to automatically implement management measures to provide additional protection of the Gulf of Maine/Georges Bank (GOM/GBK) spawning stock biomass. Changes to the current gauge and escape vent sizes in Lobster Conservation Management Areas (LCMA) 1, 3, and Outer Cape Cod (OCC) were triggered based on observed changes in recruit abundance indices in October 2023 with the inclusion of 2022 survey data in the trigger index. The Board then extended the implementation date to begin the series of changes to gauge and vent size by January 1, 2025, starting with an increase to the minimum gauge size in LCMA 1 from 3 ¼" to 3 5/16" to coordinate with Canada regarding possible trade implications, and give the industry and gauge makers additional time to prepare for these changes.

Based on a meeting held between US and Canadian lobster fishery managers and industry members in June 2024, the Board determined that postponing implementation of Addendum XXVII's biological measures to July 1, 2025 would reduce negative impacts to the US and Canadian lobster industries in 2025 and allow Canada more time to consider implementing complementary management measures.

The Atlantic States Marine Fisheries Commission was formed by the 15 Atlantic coastal states in 1942 for the promotion and protection of coastal fishery resources. The Commission serves as a deliberative body of the Atlantic coastal states, coordinating the conservation and management of nearshore fishery resources, including marine, shell and diadromous species.

Thus, Draft Addendum XXXI considers postponing the changes in minimum gauge size for LCMA 1 (inshore Gulf of Maine), and the measures under Section 3.1 of Addendum XXVII to create a common size limit for state-only and federal permit holders fishing in OCC to July 1, 2025. The Draft Addendum does not consider postponing regulations prohibiting the issuance of 10% additional trap tags in Areas 1 and 3 above the trap limit or allocation.
