Horseshoe Crab Board Approves Addendum IX *Addendum Allows Multi-Year Specifications for Male-Only Harvest*

Arlington, VA – The Commission’s Horseshoe Crab Management Board approved Addendum IX to the Interstate Fishery Management Plan for Horseshoe Crabs. The Addendum allows the Board to set specifications for male-only harvest. It also establishes a method for managing male-only harvest limits during multi-year specifications periods, reestablishes seasonal harvest restrictions, and clarifies policy related to harvest caps for Maryland and Virginia.

Addendum IX responds to recommendations from the July 2024 Horseshoe Crab Management Objectives Workshop, which convened a group of stakeholders to explore management objectives for the Delaware Bay-origin horseshoe crab fishery. Workshop participants recommended the Board establish an interim solution to maintain male-only harvest while changes to the Adaptive Resource Management (ARM) Framework are explored to better align the model with stakeholder values.

The Addendum allows the Board to set multi-year specifications for up to three years until 2031 based on the ARM Framework. In interim years when the ARM is not used, the Board will manage maximum male harvest limits based on Delaware Bay region spawning survey data. Addendum IX also reestablishes a harvest closure for the Delaware Bay region states from January 1 through June 7. Lastly, the Addendum clarifies the policy included in Addenda VII and VIII for applying Maryland and Virginia harvest caps; these caps further restrict harvest for Maryland and Virginia when female harvest is implemented in the Delaware Bay region.

Addendum IX will be available on the Commission website at <https://asmfc.org/species/horseshoe-crab/> by next week. For more information, please contact Caitlin Starks, Senior Fishery Management Coordinator, at cstarks@asmfc.org or 703.842.0740.

PR25-13

The Atlantic States Marine Fisheries Commission was formed by the 15 Atlantic coastal states in 1942 for the promotion and protection of coastal fishery resources. The Commission serves as a deliberative body of the Atlantic coastal states, coordinating the conservation and management of nearshore fishery resources, including marine, shell and diadromous species.
