Federally-permitted Herring Category A vessels must declare into the Area 1A fishery at least 45 days prior to the start of the fishing season. Small-mesh bottom trawl vessels with a federal Herring Category C or D permit must declare into the Area 1A fishery by June 1, 2026. Vessels should check with each state of landing regarding their notification procedures.

The 2026 Area 1A sub-annual catch limit (sub-ACL) is 2,640 metric tons (mt). After adjusting for the 30 mt fixed gear set-aside and the 8% buffer (Area 1A closes at 92% of the sub-ACL), the Area 1A sub-ACL is 2,401 mt. There is no research-set-aside for 2026.

In October 2025, the Board established the following seasonal allocations for the 2026 Area 1A sub-ACL: 72.8% available from June 1 – September 30 and 27.2% available from October 1 –

M26-24

December 31. Fishermen are prohibited from landing more than 2,000 pounds of Atlantic herring per day harvested from Area 1A until June 1, 2026.
